## **Level IV Facility Virtual Visit Guidelines**

## <u>Overview</u>

Providing trauma care consistent with Michigan's criteria and participating in Michigan's verification and designation process is foundational to an efficient and effective trauma system. (Facility name)'s collaboration on trauma program development with the Michigan Department of Health and Human Services (MDHHS) will improve mortality and morbidity for the victims of trauma locally and statewide.

The purpose of the verification visit is to assemble trauma program staff from your hospital, together with reviewers from the MDHHS who are experienced in trauma program implementation, to collaboratively evaluate and assess your facility's trauma care. The desired outcome is to assist you in developing a strategy for your program by identifying its strengths and opportunities for improvement. Utilize the reviewers as resources to improve. The MDHHS Trauma Section program staff are another resource available to your program.

#### Reviewers

The following reviewers are scheduled to perform your virtual visit: (Reviewer Name) and (Reviewer Name).

## **Virtual Visit Day**

Allow approximately eight hours for the virtual visit. Your Regional Trauma Coordinator, (**Name of RTC**), will participate in the review day. The Trauma Medical Director (TMD), Trauma Program Manager (TPM)/Trauma Program Coordinator (TPC) and Registrar must be available for the duration of the review. Participants are encouraged to attend the virtual visit from their own workstation to ensure they can be heard.

### **Virtual Visit Logistics**

To ensure an effective virtual visit, the following logistical aspects are important.

- 1) Participants must attend the site visit from their own workstation for better audio.
- 2) To avoid feedback, no more than one computer can be in a physical room at the same time.
- 3) The TPM/TPC is required to have Adobe Standard DC or Adobe Pro to accurately prepare the charts and required program documentation for upload into the file transfer application.

### **Virtual Visit Preparation**

The hospital will be responsible for the logistical aspects of the virtual visit, such as scheduling the appropriate participants for each component of the review day, providing technical assistance if needed, and ensuring all required participants are on the videoconferencing line for the various parts of the agenda.

The State of Michigan will provide a HIPPA compliant video conferencing platform (Zoom) for the virtual visit. The state will send the Zoom link for the visit day to the TPM/TPC or person designated by hospital who will forward the Zoom invitation to the appropriate participants at their hospital.

# File Transfer Application

The State of Michigan will provide a file transfer application for the virtual review process. The file transfer application is HIPPA compliant, and password protected. The file transfer application can be found on the following link: <a href="https://milogintp.michigan.gov">https://milogintp.michigan.gov</a>. Follow the steps below to access the file transfer application where all documents and medical charts pertaining to the virtual visit will be uploaded.

- Refer to pages 4-5 on the File Transfer User Manual to request access State of Michigan MILogin interface.
- 2) Request access to the file transfer application **and** the specific folder that has been assigned for the site visit on the file transfer application. The instructions to complete this step are found on pages 6-8 in the *File Transfer User Manual*. **Please note that the State Trauma Designation Coordinator will notify you of the specific folder you will request access to in the official virtual visit notification email**.

Once you have gained access to the file transfer application, you will use the "**share file**" option to upload all documents and medical records for the virtual visit. Instructions to sharing files can be found on pages 14-15.

The hospital will be responsible for uploading the following documents into the file transfer application:

- ☐ 45 days prior to the scheduled virtual visit:
  - Pre-Review Questionnaire (PRQ) The PRQ and attachments should be in a single pdf document.
  - Designation Application
  - o Completed Chart Review Selection (CRS) Template
- ☐ 14 days prior to the scheduled virtual visit:
  - Medical records chosen by reviewers with pertinent documentation (ensure the Chart Summary Form is completed and is the first page of each medical record)
  - o Program documentation

#### **Pre-Review Call**

The hospital will schedule a pre-review meeting approximately 30 days prior to the scheduled virtual visit with the review team. The pre-review meeting will include the TMD, TPM/TPC, EMR navigators, and Regional Trauma Coordinator. The purpose of the meeting is to review the virtual visit agenda, address questions on chart selection, chart upload process, and ensure all technical, logistical issues and/or questions are addressed prior to the virtual visit. The lead reviewer is responsible for leading the call.

#### Virtual Visit Agenda

Refer to the *Level IV Virtual Visit Agenda* for further information. A typical agenda for the virtual visit will consist of:

8:00 a.m.	Introductions to facility team, review logistics for virtual site review process,
	and a facility PowerPoint presentation on the trauma program and PI plan/process
8:30 a.m.	Medical record and program document review
11:00 a.m.	Review and discuss PRQ with pertinent hospital staff.
12:00 p.m.	Lunch break – Review team touch base on medical record and program review
12:45 p.m.	Live hospital tour: ED, Radiology, OR, Med/Surg Floor and Blood Bank
•	(ICU and Rehab if applicable)
1:45 p.m.	Reviewer huddle to touch base after tour
2:00 p.m.	Meeting with TMD and TPM/TPC
2:30 p.m.	Site Review Wrap-Up: Review team discusses findings internally
3:30 p.m.	Exit Interview: Review team discusses findings with facility

## **PowerPoint Presentation**

The hospital will prepare a PowerPoint presentation to provide a brief overview of the hospital and trauma program. Some ideas to include, but not limited to, location of hospital, trauma centers in area, picture of hospital, hospital beds and patient numbers, PI levels of review, audit filters, etc.

## **Chart and Program Document Review**

The hospital will complete and upload the *Chart Review Selection (CRS) Template* to the file transfer application at least 45 days prior to the scheduled review date. The *CRS Template* will include the most recent medical records within the reporting year in the following categories:

- Trauma deaths (10 each)
- Trauma transfers (10 each)
- Trauma team activations (10 each)
- Trauma patients admitted by non-surgeons (10 each)
- Admissions with high ISS (greater than 16) (10 each)

In the event there are less than ten records, the hospital will provide information on the medical records available for the above categories within the reporting year. Do not put the same chart in more than one category. If a chart fits into more than one category, put the chart in the most appropriate category. Prior to the review day, reviewers may ask for additional charts within these categories if they feel it important to have more information.

Once the *CRS Template* is uploaded into the file transfer application, the lead reviewer will have 10 days to select the medical records they will review. The lead reviewer will notify the hospital once the charts have been selected. The selected medical records must be uploaded to the file transfer application at least 14 days prior to the scheduled review date. Each medical record must have all pertinent documentation along with a copy of the guidelines/protocols that were followed to care for the trauma patient. Utilize the *Medical Record Review Guidance* document for information on what components of the medical record to upload. In addition to the selected medical records, the hospital will upload required program documentation to the file transfer application at least 14 days prior to the scheduled review date. The *Virtual Visit Documentation Requirements* details all required documentation.

During the medical record and program document review portion of the virtual visit agenda, both reviewers will be on the same Zoom meeting with the TMD and TPM/TPC. The TMD and TPM/TPC will be in separate physical rooms on the same Zoom meeting. Each reviewer will take turns reviewing their selected medical records, including PI, and supporting documentation with the TMD and TPM/TPC. Throughout the course of the chart review, the reviewers may be utilizing multiple screens and looking away from the camera at times The TPM/TPC should share their screen and pull up the appropriate chart as it is being reviewed. Level IV facilities may want to have someone from medical records readily available for any EMR related needs.

#### **Review Meeting**

At the review meeting, the PRQ will be reviewed and discussed. The TPM/TPC will have the PRQ open and share the screen so all participants can see the PRQ. The hospital must provide the State and reviewers a list of names of all attendees and their positions. Each attendee must log into the videoconferencing meeting separately from their workstation. The following staff must be available for questions and discussion:

- 1. Hospital administrator responsible for the trauma program
- 2. Trauma Medical Director
- 3. Trauma Program Manager/Trauma Program Coordinator
- 4. Trauma Registrar (if different than TPM/TPC)
- 5. Trauma liaisons (Emergency Medicine, Radiology, Anesthesia, ICU)
- 6. EMS Representative

The review meeting is an opportunity to ask clarifying questions about the PRQ, chart, and/or performance improvement process.

## **Tour**

The hospital must rehearse the tour to ensure everything will run smoothly the day of the review. Items to be tested include the video, microphone, and speakers of the phone/tablet/laptop being used to broadcast the tour. Ensure those conducting the tour can be seen and heard on the virtual tour and that they can hear those on the other end of the line asking them questions. Refer to the *Site Tour Equipment Checklist* to see the equipment site reviewers will be looking for during the tour.

## A. Emergency Department

- 1. Review emergency department facility, resuscitation area, equipment, protocols, flow sheet, staffing, and trauma call
- 2. Interview emergency physician and emergency nurse
- 3. Review the pre-hospital interaction (i.e., hand-off, report)

#### B. Radiology

- 1. Tour facility
- 2. Interview radiologist and technician
- 3. Determine patient monitoring policy
- 4. CT log (if applicable)

#### C. Operating Room/PACU

- 1. Interview operating room nurse manager, PACU nurse and anesthesiologist/CRNA
- 2. Check operating room schedule
- 3. Determine how a trauma OR suite is opened STAT
- 4. Review equipment availability

## D. ICU (if applicable)

- 1. Tour facility/review equipment
- 2. Review patient care documentation
- 3. Interview medical director or nurse manager
- 4. Discuss patient triage and bed availability

#### E. Blood Bank

- 1. Tour facility
- 2. Interview technicians
- 3. Determine availability of blood products
- 4. Review massive transfusion protocol

## F. Medical Surgical Floor

- 1. Tour facility
- 2. Review equipment
- 3. Review patient care documentation
- 4. Interview nurse manager
- 5. Discuss patient triage and bed availability

## G. Rehabilitation (if applicable)

- 1. Tour facility
- 2. Interview staff
- 3. Determine where rehabilitation is initiated

#### Meeting with TMD and TPM/TPC

This meeting is an opportunity for the reviewers to discuss findings with the TMD and TPM/TPC. If needed, the TMD and TPM/TPC can discuss any concerns with reviewers.

# Site Reviewer Wrap-Up: Closed Session

The reviewers will go into closed session to prepare for the exit interview for no longer than 60 minutes.

#### **Exit Interview**

The reviewers will present their preliminary findings. The exit interview is considered confidential, and the hospital may wish to construct its attendance list carefully. It is recommended that everyone attend from their own workstation vs. one large room. The four major headings below will be covered:

- 1. Deficiencies
- 2. Strengths
- 3. Areas of Opportunity
- 4. Recommendations

The exit interview is an important opportunity to recognize program development, best practices, and provides a collaborative and collegial forum to discuss improvements. Use the experience of the reviewers to strategize opportunities for improvement. At a minimum, the following people should be in attendance.

- 1. Hospital administration
- 2. Trauma Medical Director
- 3. Trauma Program Manager/Trauma Program Coordinator
- 4. Regional Trauma Coordinator
- 5. Others as desired by hospital administration

The reviewers' findings are preliminary. MDHHS will make the final verification and subsequent designation determination. Any questions after the visit and before the final determination should be directed to the State Trauma Designation Coordinator.

# **Verification/Designation Determination Outcomes**

- No criteria deficiencies = three-year verification/designation determination.
- Three or fewer type II criteria deficiencies = one year verification/designation determination with focused review (documentation submission or on-site/virtual review) to extend an additional two years.
- Type 1 deficiency(ies) or four or more type II criteria deficiencies = Denied verification/designation

## **Final Report**

Upon completion of the virtual visit, the review team members will submit a final report to MDHHS. The report will be reviewed by the Designation Subcommittee who will forward their recommendation regarding the verification/designation determination to MDHHS. The final verification/designation determination will be made by MDHHS based on recommendations from the Designation Subcommittee and the Review Team.
